

Report
Of
Teaching Internship

Submitted
To

School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of
B.Tech CSE

By

Roll Number of Student : **25SCS1003003186**

Name of Student : **RIDDHI SINGH**

Batch : **2025-29**

2026-27

1. CANDIDATE'S DECLARATION

I, RIDDHI SINGH, do hereby declare that the teaching internship report titled "Teaching Internship" has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in CSE. This report presents my teaching internship experience at Government Composite Upper Primary School (UPS Mahraipur).

The internship was completed for a duration of four weeks from 25-06-2026 to 20-07-2026. During the internship, I worked as a teacher and taught students from Pre-Nursery up to Class 1. The report is based on the teaching work and experience gained during the internship.

Signature:

Student Name: RIDDHI SINGH

Roll No.: 25SCS1003003186

2. ACKNOWLEDGEMENT

I would like to express my sincere gratitude to everyone who supported me throughout my teaching internship. The internship provided me with an opportunity to work in a school environment and gain practical experience of teaching and interacting with young learners.

I am thankful to Government Composite Upper Primary School (UPS Mahraipur) for providing me the opportunity to complete my four-week internship. Working with students from Pre-Nursery up to Class 1 helped me gain practical exposure to the teaching-learning process at the early school level.

I am grateful for the opportunity to conduct educational sessions in English and Mathematics and to work on students' basic concepts, communication skills and problem-solving abilities through interactive learning methods.

I am also thankful to my parents for their blessings and support throughout the internship.

Signature: 

Student Name: RIDDHI SINGH

Roll No.: 25SCS1003003186

3. INTERNSHIP COMPLETION CERTIFICATE

**GOVERNMENT COMPOSITE UPPER
PRIMARY SCHOOL (UPS MAHRAIPUR)**

Village: Mahraipur | Block: Purkaji | District: Muzaffarnagar, Uttar Pradesh

UDISE Code : 09020400202

COMMUNITY CONNECT COMPLETION CERTIFICATE

Date: 25-06-2026 to 20-07-2026

TO WHOMSOEVER IT MAY CONCERN

This is to certify that **Riddhi Singh**, a student of **B.Tech (Computer Science & Engineering)** at **IILM University, Greater Noida**, has successfully completed the Internship at **Government Composite Upper Primary School (UPS Mahraipur)** for a duration of **four weeks**.

During the programme, she conducted educational sessions on English and Mathematics for school students, focusing on improving their basic concepts, communication skills, and problem-solving abilities through interactive learning methods.

We appreciate her sincere efforts and valuable contribution towards enhancing students awareness of subject and wish her success in her future endeavors.

4. TEACHING INTERNSHIP DESCRIPTION

4.1 Introduction

Teaching is a practical process that involves communication, interaction and support for students' learning. A teaching internship provides an opportunity to experience this process directly and to understand how classroom learning takes place in practice.

I completed my teaching internship at Government Composite Upper Primary School (UPS Mahraipur) for a period of four weeks, from 25-06-2026 to 20-07-2026. During the internship, I worked as a teacher and taught students from Pre-Nursery up to Class 1.

The internship involved educational sessions in English and Mathematics. The work focused on improving students' basic concepts, communication skills and problem-solving abilities through interactive learning methods. Since the students were at an early stage of schooling, the teaching experience also involved maintaining interaction and encouraging participation during the learning process.

The internship provided practical exposure to working with young learners and helped in understanding the role of a teacher in creating a supportive and engaging learning environment.

4.2 School Profile

The teaching internship was completed at Government Composite Upper Primary School (UPS Mahraipur). The school is located in Mahraipur, Block Purkaji, District Muzaffarnagar, Uttar Pradesh.

The school details mentioned on the completion certificate are given below:

Particular	Details
School Name	Government Composite Upper Primary School (UPS Mahraipur)
Village	Mahraipur
Block	Purkaji
District	Muzaffarnagar
State	Uttar Pradesh
UDISE Code	09020400202
Internship Duration	Four weeks
Internship Period	25-06-2026 to 20-07-2026

The school provided the setting in which the teaching internship was carried out. The internship involved direct teaching and interaction with school students.

4.3 Teaching Context

The teaching context of this internship was focused on young learners from Pre-Nursery up to Class 1. Students at this stage are developing their basic understanding and communication skills, making simple and interactive teaching an important part of the classroom experience.

During the internship, educational sessions were conducted in English and Mathematics. The official completion certificate states that the sessions focused on improving students' basic concepts, communication skills and problem-solving abilities through interactive learning methods.

The teaching experience therefore involved more than simply presenting subject content. It also involved interacting with students, encouraging their participation and supporting their understanding according to their learning level.

The attached photographs provide additional visual evidence of the internship activities and the interaction with students.

4.4 Internship Objectives

The main objectives of the teaching internship were:

- To gain practical experience of teaching in a school environment.
- To work with young learners from Pre-Nursery up to Class 1.
- To conduct educational sessions in English and Mathematics.
- To support students in understanding basic concepts.
- To encourage communication and interaction during the learning process.
- To support the development of problem-solving abilities.
- To use interactive learning methods while teaching young students.
- To gain practical experience of student engagement and classroom interaction.

4.5 Scope of the Internship

The scope of the internship was centered on teaching and interacting with students from Pre-Nursery up to Class 1. The internship covered educational sessions in English and Mathematics and focused on the learning needs of young students.

The teaching work included supporting basic concepts, communication skills and problem-solving abilities. Interactive learning methods were used to make the learning process participatory and suitable for young learners.

The internship also provided practical exposure to the classroom environment and to the responsibilities involved in communicating with and teaching young students.

4.6 Classes and Learning Areas Covered

During the internship, I taught students from Pre-Nursery up to Class 1. The completion certificate specifically records educational sessions in English and Mathematics.

Area	Details
Student Level	Pre-Nursery up to Class 1
English	Educational sessions for school students
Mathematics	Educational sessions for school students
Main Learning Focus	Basic concepts, communication skills and problem-solving abilities
Learning Method	Interactive learning methods

The teaching experience at this level required attention to basic learning and communication. English and Mathematics provided the subject context for developing students' understanding, while interaction supported their participation in the learning process.

4.7 Teaching Approach for Young Learners

The teaching approach was adapted to the learning level of young students. Students from Pre-Nursery to Class 1 are at an early stage of formal education, so the teaching process requires simple communication, clear explanation, interaction and active participation.

The approach used during the internship focused on helping students understand basic concepts rather than making the learning process unnecessarily complicated. Interactive learning was used as an important part of the sessions, allowing students to remain involved in the classroom.

Communication was another important part of the teaching approach. Interaction with young learners supported the development of communication skills and helped create a more engaging learning environment.

The approach also supported problem-solving abilities. Even at an early learning level, students benefit from opportunities to think about a question or task and

respond to it. The internship therefore connected basic concept learning with student participation and problem-solving.

4.8 Teaching Methodology

The teaching methodology followed during the internship was based on interactive learning and age-appropriate communication. The main elements of the methodology were:

Simple Concept Explanation: Basic concepts were approached through clear and understandable explanations suitable for young learners.

Interactive Learning: Interaction was used to involve students in the learning process rather than keeping the session limited to one-way communication.

Student Participation: Students were encouraged to participate and remain involved during educational sessions.

Communication: Classroom interaction supported the focus on communication skills mentioned in the completion certificate.

Practice and Understanding: The learning process emphasized understanding basic concepts and applying them during classroom interaction.

Problem-Solving: The sessions supported students' ability to think about and respond to problems at their learning level.

This methodology was appropriate for the teaching internship because it connected subject learning with interaction and participation. It also provided practical experience in adapting communication to the needs of young learners.

4.9 Classroom Interaction and Student Engagement

Classroom interaction was an important part of the internship. Working with young students required communication that was simple, clear and engaging. Student participation helped make the learning process interactive.

The internship provided practical experience of engaging students during educational sessions. The teacher's role involved explaining concepts and interacting with learners so that they could remain involved in the classroom.

The photograph included in this report shows students participating together in an outdoor learning or engagement setting. It provides visual evidence of the students involved during the internship period.

Figure 4.1: Students participating in an outdoor learning/engagement activity

The teaching experience also included an activity-oriented learning environment. The attached photograph of an activity session provides additional evidence of practical engagement during the internship.

Figure 4.2: Activity-based learning session

4.10 Teaching Activities and Learning Experience

The internship provided practical exposure to the day-to-day experience of teaching young learners. The activities were connected with educational sessions in English and Mathematics and with the broader learning goals stated in the completion certificate.

An important part of the experience was interacting with students at an early stage of their education. Teaching at this level requires attention to basic understanding and communication. The internship therefore provided an opportunity to experience the importance of patience, clear communication and student participation in teaching.

The learning experience was not limited to subject content. It also involved understanding how students respond to classroom interaction and how an engaging environment can support their participation.

The attached activity photograph also demonstrates participation in a creative classroom setting, adding visual evidence of the practical nature of the internship.

4.11 Learning Outcomes

The four-week internship resulted in practical learning related to teaching, communication and student interaction. The major learning outcomes were:

- Gained practical experience of working as a teacher in a school environment.
- Gained experience of teaching young learners from Pre-Nursery up to Class 1.
- Gained experience in conducting educational sessions in English and Mathematics.
- Developed practical understanding of interactive learning methods.
- Gained experience in focusing teaching on students' basic concepts.
- Developed experience in communicating and interacting with young learners.
- Gained practical exposure to encouraging student participation.
- Gained experience related to supporting communication and problem-solving abilities.
- Developed a better understanding of the teaching-learning process at the early school level.

Overall, the internship provided practical experience of teaching young students and helped in understanding the importance of basic concepts, communication, interaction and participation in early school learning.

4.12 Internship Completion Certificate and Evidence

The internship completion certificate issued by Government Composite Upper Primary School (UPS Mahraipur) serves as formal evidence of successful completion of the four-week internship. It records the internship period from 25-06-2026 to 20-07-2026 and confirms the teaching work carried out during the programme.

The certificate states that educational sessions were conducted on English and Mathematics for school students, with a focus on improving basic concepts, communication skills and problem-solving abilities through interactive learning methods.

Along with the certificate, four different photographs from the internship are included as supporting evidence of student participation, classroom engagement and activity-based learning. Each photograph is included only once in the report.
